Overview

The Project Management Fundamentals course is designed to introduce participants to the principles and practices of project management. It is based on the accredited project management course and tailored to your organisation's needs. It is condensed into two days without losing the essential ingredients of the skills and methodology required of good project managers.

The course is suitable for those who work in project teams and need a good overview of project management.

Participants will gain a knowledge in:

- Time management
- Cost management
- Managing project scope
- Quality Management techniques
- Human resources management approaches
- Communication techniques

Program Duration

The course requires classroom attendance for two days which can be organised to meet your organisation's needs.

Resources provided by MNMS:

- Course materials and resources
- Tools necessary to manage a project.
- Issuance of parchments
- Any advice/trouble shooting required along the way
